Subject: Settlement opinion

Dear Sirs:

I'm sure you have many thousands of these comments to process, so I'll be brief.

If the proposed DOJ settlement is approved, the US Government will be publicly acknowledging that a single company is more powerful than law or government. It means that a corporation will have ultimate say over its behavior and impact on us, but our government and laws, which we are supposed to trust, will not and can not protect us.

Don't throw us to the wolves. The settlement is ineffective to the point of being comical. Come up with something better. Please.

Sincerely,

Doyle Rockwell
